

KEF inst@nt dvd theatre

Provisional Information

KIT120HD

CONFIDENTIAL
INTERNAL USE
ONLY

The demand for Home Theatre in a Box solutions is somewhat "fuelled" by what is for many, the apparent over-complexity of connecting and successfully operating different AV components such as loudspeakers, amplifiers, receivers, dvd players etc. Furthermore, the final combination can look messy, hence many consumers prefer the pre-configured system approach.

The KEF Instant Theatre (KIT) concepts takes this to a new level. Firstly the system is not only technically compatible but is also aesthetically pleasing as a whole system. The "surround sound from only two speakers" then gives KIT a further USP (unique selling point) over the plethora of other Home Theatre in a Box systems on the market.

With the overwhelming success of KIT100, there is a need to enhance the system with the most contemporary features (i.e. launch a series 2) in order to meet the evolving needs of the KIT consumers. The new KIT120HD is iPod and USB 2.0 compatible and can also be linked to an HDMI ready TV.

As would be expected from KEF the Uni-Q drivers remain at the heart of the speaker system, and together with the NXT flat panels combine to produce a 5.1 surround sound effect (using the phantom centre). The system is available in both stardust silver and high gloss black.

Features and Benefits

DVD unit

- HDMI video output
- Slim and compact DVD unit that can be connected with most USB devices and other portable devices through 3.5mm audio jack
- Front panel features backlit buttons in KEF blue
- 'Readable' front panel display, in harmony with the overall aesthetics

Speaker System

- With only two speakers and one subwoofer delivering quality surround sound
- KEF patented Uni-Q technology means you can sit anywhere you like to enjoy the rich sound effects.

Remote control

- A brand new remote control with 'cool' metallic feel. KEF blue backlit buttons improve visibility in darker environments
- Ergonomically designed remote control with optimised positioning of 'main' buttons

Accessories

- Optional Music / video player docking system available for connecting and charging up all models of iPod

Specifications
